

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claim 1 (Currently Amended): A task light comprising: plural illumination means aligned in the horizontal direction on a display that is rotatable about a vertical axis with respect to a console; a detection means for detecting a rotational position of the display with respect to the console; and a lighting means for selectively lighting at least one of the plural illumination means so as to illuminate approximately the entire console, based on the rotational position of the display detected by the detection[[ng]] means.

Claim 2 (Currently Amended): A task light comprising: rotatable illumination means provided approximately at the center in the horizontal direction on a display that is rotatable with respect to a console; and a rotating means for rotating the illumination means so as to illuminate approximately the entire console, based on the rotational position of the display with respect to the console detected by [[the]] a detection means.

Claim 3 (New): The task light of claim 1, wherein a first illumination means is selectively lit when the display is at a first position.

Claim 4 (New): The task light of claim 3, wherein a second illumination means is selectively lit when the display is at a second position, and wherein the first illumination means is not the second illumination means.

Claim 5 (New): The task light of claim 1, wherein the detection means has an at least one mutually opposing conductive member adaptable with a contact metal fitting to correspond to the position of the display.
